Experience

Software Engineering Intern

TechSpark Innovations, Seattle, WA (Jun 2023 - Aug 2023)

- Contributed to the development of a web application for internal data visualization using React and Node.js.

- Collaborated with senior engineers to optimize API endpoints, reducing response time by 15%.

- Gained experience in Agile development practices, including daily stand-ups and sprint planning.

Student Research Assistant

University of Washington, Computer Science Department (Jan 2023 - May 2023)

- Conducted research on machine learning algorithms to improve natural language processing tasks.

- Implemented a Python-based prototype to analyze text sentiment with an 85% accuracy rate.

Education

Bachelor of Science in Computer Science

University of Washington, Seattle, WA (Expected Graduation: May 2025)

- GPA: 3.9/4.0

- Relevant coursework: Algorithms, Data Structures, Software Development, Machine Learning, Databases

Projects

Personal Portfolio Website

- Built a responsive personal portfolio website using HTML, CSS, and JavaScript.

- Showcased projects, skills, and contact information for potential recruiters.

Weather App

- Developed a weather forecasting app using Python and OpenWeatherMap API.

- Implemented features to display current weather, weekly forecasts, and city-specific data.

Team Collaboration Tool (Capstone Project)

- Designed and developed a team collaboration tool for task management using React and Firebase.

- Focused on creating an intuitive user interface and real-time data updates.

Skills

- Programming Languages: Python, JavaScript, Java

- Frameworks & Tools: React, Node.js, Firebase, Git

- Databases: MySQL, MongoDB

- Soft Skills: Team collaboration, problem-solving, time management
